

OVERSOLD GRAIN MARKET ADVANCES AFTER EARLY LOWS

Weather Conditions Over Spring Wheat Belt Benefit Crop.

CHICAGO, July 5.—Weather conditions over the spring wheat territory, both sides of the international line, were extremely favorable over the holiday with rains in the Canadian Northwest which will be beneficial. Local traders were rather bearish early and sold freely, and with pressure attributed to a local elevator interest, prices declined over 1 cent from Monday's finish, but the market became slightly oversold and a strong rally followed which carried values above the previous finish. Up to noon prices had a range of 1 1/4 to 1 1/2 cents, and showed more strength than the September and practically the same figure against 1/4 cent discount at the close Monday. Country offerings of new wheat in all sections are light, and New Orleans outbid Chicago 2 1/2 cents for new hard winter in the interior and is getting the bulk of the grain. Bids of 12 cents over September, track the Gulf, were made for No. 1 hard shipments by July 15, and 11 cents over for all July shipment. Export demand continues slow.

Coarse Grains.

Corn showed independent strength and advanced to a new high on the present movement. Resting orders to sell September at 67 cents were finally absorbed and with local and commission house buying the price advanced to over 68 cents. Oats held within narrow limits with the July gaining on September, selling at 1 1/2 cents, over recently. Crop reports on corn are favorable. Demand for cash corn good with the basic 1/4 cent better as compared with the July No. 2 yellow and white bringing 1 1/2 to 1 3/4 over the future, with some inquiries here.

ERRATIC COTTON CLOSES WITH LOSS

Crop Makes Fair Rally After Overbought Condition Brings Lower Opening.

NEW YORK, July 5.—The cotton market after opening 15 to 32 points lower, due to an overbought condition, rallied on reports of heavy rains in the eastern belt and sold off again 40 points under last night's close, on reports of improved conditions in the western belt. There was good support on all breaks, and consequently the market rallied on export calling. There were indications that English spinners and brokers were not inclined to become too pessimistic on the supply of crop situations, and that they would go easy on the buying side, even if they had to pay premiums for future needs. This attitude on the part of English spinners was reflected in the Liverpool market, which sagged on pressure by longs, and selling for Manchester account.

The ring crowd turned against the market and sold quite freely. Their selling was perhaps induced by reports of clear weather over the west and current gossip that the government estimate of the conditions in the eastern states was too low. It developed upon inquiry that the bureau put the South Carolina condition low, out of fear of subsequent weevil damage. If this was the case, the local crowd thought that the government should have come out with a report between 75 and 74 per cent. Some attention was attracted to the report that the Interstate Commerce Commission had given their assent to a revision upward to cotton freight rail rates. On July 25 the rate from Memphis to New Orleans from \$1.21 to \$1.37 per 100 pounds, and from Memphis to New Orleans from 59 cents to 85 cents. It is understood that the Mississippi Barre Service are permitted to charge 80 per cent of the rail rate, which is now equal to \$4.25 a bale, whereas the barge rate would be \$3.40 from Memphis to New Orleans. Some of the biggest spot interests in the country had been expecting such a figure, and there were great many traders disappointed in the government figure. The condition of South Carolina, for instance, was privately reported at 75 per cent and that of Georgia at 73 per cent, whereas the government placed the condition in these states at 60 and 58, respectively.

Consolidated Gas Tr. Brk.

Business was again fairly brisk in the Consolidated Gas Tr. Brk. The explanation for that, of course, is that the company has the right to redeem the 7 1/2 of September 1, this year, at 102 1/2, and has expressed its intention to exercise this privilege. Bonds are convertible into common stock at par, however, on any interest date. Among the cheaper rail bonds there was today a somewhat improved tone, but their behavior was not as pleasing to those who want advanced values as was that of the better grade bonds.

GILT EDGED BOND QUOTATIONS TURN DISTINCTLY FIRMER

Greater Supply of July Reinvestment Funds Enters Market.

NEW YORK, July 5.—A greater supply of the July reinvestment funds found their way into the bond market today. It would appear, for gilt-edged investment issues turned distinctly harder in price over virtually the entire list. Business was nowhere lively, to be sure, but there has been nothing of late to give reason for expecting a sudden outburst of buying in bonds and the slow improvement in today's quiet session, therefore, was enough to encourage many of Wall Street's prophets. Good demand appeared all along the line for strictly gilt-edged securities, and, with that condition, operating contemporaneously with government purchasing, it is not surprising, perhaps, that the various Liberty issues should have made so favorable a showing during the day.

War Bonds Improve.

Smart improvement came during the trading hours of all of our war government war bonds, under the pressure of fairly active buying, and four of the descriptions pushed forward into new high ground through gains of 5 to 20 cents on the 100 lot. Not all of the day's advances, however, came within this department. The highest grade corporate issues did better. Atchinson's general 4's, for example, which stand near the top of the list of such bonds, so far as quality is concerned, were more active and touched 92 1/2 as against their Monday's close at 91 1/2. Flotation today of the B. E. Goodrich Company's new \$20,000,000 first 4 1/2's did not disturb the bond market in any visible manner.

Consolidated Gas Tr. Brk.
